WORK EXPERIENCE (3+ YEARS)

Full Stack Software Engineer INTECH Process Automation

06/2020 - Present

Lahore

Achievements/Tasks

- Working on Industry 4.0 applications which help customers to address operational optimization and performance challenges in various industries globally.
- Working on both frontend (React.js, mobx) and backend (Node.js, Express.js, GraphQL) tools including typescript.
- Migrated large database from prisma v1 types to prisma v2 models, added ETL layer for file handling in graphql and implemented cache invalidation in apollo client.

Full Stack JavaScript Developer UNIT23

10/2017 - 06/2020

Lahore

Achievements/Tasks

- Worked on multiple applications including e-commerce and Schedulingplus application which provides services for easy maintenance of employee's time schedules, tasks, paychecks, holidays, leaves, positions, payroll etc.
- Worked on both frontend (Vue.js, Vuex, React.js) and backend (Node.js, Express.js, Mysql) tools.
- Worked on design, implementation and deployment of new features for both web and mobile apps.
- Manage and upgrade android releases for mobile apps which is built in react-native.
- Implemented CI/CD for schedulingplus using jenkins pipeline, helped in dockerizing the application so it can run in microservices architecture and migrated our development and staging environment to kubernetes cluster using kops and helm.
